## EDUCATION

**2023 - 2024**

**PROFESSIONAL LICENSE IN WEB AND MOBILE ENGINEERING**

- Professional license in web and mobile engineering Ensa berrechid.

**2021 - 2023**

**TECHNICIAN SPECIALIZED IN DIGITAL DEVELOPMENT (WEB FULL STACK)**

- Institut Spécialisé de Technologie Appliquée NTIC

**2020-2021**

**BACHELOR OF SCIENCE IN PHYSICS**

## PROFESSIONAL EXPERIENCE

**Web Development Internship at the company Helloworld
November 2023 to January 2024**

Built websites from scratch using HTML, CSS, PHP, and WordPress. Edited images in Photoshop for visual quality, combining technical skills and creativity.

**Web Development Intern (PFF internship) at the company CodUp
April 2023 to May 2023**

During my PFE internship, I developed websites using PHP Laravel and worked on WordPress projects. This experience enhanced my web development skills and allowed me to apply my knowledge in a professional setting, contributing to effective web solutions.

## PROFILE SUMMARY

I am a recent graduate with a Professional License in Engineering, specializing in Web and Mobile Development from ENSA Berrchid. I have strong skills in HTML, CSS, Bootstrap, and Tailwind, along with advanced expertise in JavaScript and ReactJS for dynamic web applications. My backend knowledge includes PHP, Laravel, Java, and database management with MySQL and MongoDB.

I'm experienced in Agile methodologies and DevOps practices, ensuring efficient project delivery. Currently, I'm pursuing a Data Analytics program at ALX Africa to enhance my analytical skills. Additionally, I'm proficient in WordPress development and customization.

## PROJECTS

**E-Book E-Commerce Platform**

- Developed a Laravel and ReactJS-based platform for e-books.
- Utilized Postman for API testing and managed data with MySQL.
- Followed Scrum methodologies and collaborated on GitHub.
- Created UML diagrams and project specifications (cahier de charges) for comprehensive project analysis and design.

**Hospital Management System**

- Led the development of a Java-based hospital management system.
- Focused on efficient data handling using MySQL.
- Developed UML diagrams and project documentation for effective planning.

**MaxDelivery**

- Developed a comprehensive web application for a delivery system using ReactJS, Tailwind CSS, and Laravel with MySQL.
- Implemented all functionalities, including order tracking and order creation.
- Created UML diagrams and detailed project documentation for effective analysis and design.

**Apartment Sales and Estimation App**

- Developed a web application for buying and selling apartments using ReactJS and Laravel.
- Enabled users to compare prices and enter property features for price estimation.
- Created UML diagrams and detailed project documentation for effective analysis and design.

**WordPress Websites**

- Construction Company Website: hdbtp.org – Developed a professional site for a construction business.
- Coffee Shop Website: cafeonenero.com – Created a visually appealing site for a coffee shop.
- Casanav: Contributed to the customization and enhancement of functionality in a WordPress project, including UML modeling and project specifications.
